TRU FLIGHT CONNECT™

TRU FLIGHT CONNECT™

TRU Flight Connect™ gives users the ability to easily link their preferred Electronic Flight Bag (EFB) applications to a TRU flight simulator—allowing for the immediate display of real-time flight data on their device.

Spend less time setting up and more time training with the “tap-connect-go” efficiency of Flight Connect™. The system allows users to train in the same way they operate their aircraft. This makes TRU Flight Connect™ a great resource for pilots and instructors who want to get the most out of their simulator training.

COMPATIBLE WITH:

avplan efb

GARMIN

WINGX

FLIGHT CONNECT™ BENEFITS:

- Compatible with Apple®, Android® and Microsoft® Surface® products.
- Works with all commonly used electronic flight bag apps.
- Allows up to five devices to be connected per simulator.
- Bluetooth V2.1 and EDR with a 33 ft range (Line of Sight).
- Bluetooth Secure Simple Pairing (SSP).
- Simple tap-connect-go setup.
- Custom Bluetooth name configuration for multiple simulators in one room.
- Monitor the flight of the aircraft via the following simulator variables sent to the EFB:
 - Latitude
 - Longitude
 - Altitude
 - Heading
 - Speed
 - Time
